HOW IT
WORKS

The Scala digital signage software platform allows retailers, employers and marketers to tailor communications focused for a specific audience, location and time.

1 Contents are created with
   Scala Designer

2 Media contents are uploaded
   on the Content Manager

3 Contents are arranged into a playlist and
   scheduled for playback

4 Player downloads
   the content plan

A centrally managed and locally updatable content management system allows for message refinement that creates a unique, personal way of communicating to audiences, including customers, personnel, visitors and students.
